# Views divided on floating AMC to revive stressed power assets

Potential power sector stakeholders concerned over clash of roles

RISHI BANJAN KALA  
New Delhi, January 12

The idea to create a power asset management company, reviving stressed assets, has been a hot topic among stakeholders. The PMARC will take over such projects through a bidding process, a change in management or through the NCIIT.

Such an entity will manage a portfolio of operations and maintenance and to complete the construction. It will be a special agency who are interested in all during the process and will not be involved in the construction. These agencies can also act as a partner by acquiring equity along with the PMARC officials.

Such an entity will manage a portfolio of operations and maintenance and to complete the construction. It will be a special agency who are interested in all during the process and will not be involved in the construction. These agencies can also act as a partner by acquiring equity along with the PMARC officials.

Power consumption in India declined by more than two per cent during 2020.

create another company or suggested that such projects, whether thermal or hydro, should be taken over by PMARC working in the similar domain. "Also, there may be conflict of interest as RRC and PMARC shall be equity holders of PMARC and at the same time are lenders of the stressed assets. Besides, some of the success through NCIIT cannot be certain," the industry said, explaining the concerns made by NCIIT.

**Specific domains**  
PowerGrid favoured a similar approach, the officials said. "NTPC suggested that GSE under a PMARC and most directly in SPVs belongs to assets in their domains as the PMARC will be in a better position to make these SPVs operational and commercially viable," he added.

PMARC India favoured the proposal. However, NCIIT officials

# 'India's annual power demand to grow at 6.5%

RISHI BANJAN KALA  
New Delhi, January 12

India's power demand is expected to grow at an annual rate of 6.5 per cent between 2022 and 2024, according to a report by the International Energy Agency (IEA) on Tuesday.

The estimate comes as India clocked the highest 10 per cent year-on-year growth in power demand during the 2021 calendar year, sharing the stage with China. This was achieved in a year when global consumption witnessed its highest ever annual increase in absolute terms of more than 1,000 TWh, a wait bonus (12 per cent) as well as the largest relative rise since 2010.

"Over 2022-2024, we expect annual demand growth to remain above pre-pandemic levels at around 6.5 per cent per year," the IEA said in its latest report on power, stating demand projections.

"The maturity of supply growth in the years between 2019 and 2022,"

followed by India, 12 per cent; Europe, 10 per cent; and the United States, 9 per cent," the report has revealed.

**Power consumption**  
Power consumption in India declined by more than 2 per cent during 2020 as the country faced the COVID-19 pandemic. However, the following year demand witnessed a rebound with growth of estimated 10 per cent. This took demand to higher than pre-pandemic levels, despite the onrush of new capacity variants during March/April 2021.

The trend in India, declined 4.5 per cent between April/June 2021, due to stringent COVID-19 cases. Power consumption recovered quickly in June and reached new all-time high in July and August, temporarily outpacing supply shortages, peaking at the beginning of the fourth quarter of 2021, did not prevent strong annual growth, which is estimated at 10.4 per cent year-on-year, the report says.

Two-wheelers are being sold and exchanged over the blockchain in the first of its kind service to North Goa.

# The song and dance over ticket pricing in Tollywood

KV KURMANATH  
Hyderabad, January 12

As it attracted a more national audience with gripping scripts such as *Andha Deham* and *Pushpa*, the Telugu industry, Tollywood, is finding it difficult to deal with a situation that is tormenting it for the last few months. Producers, distributors, exhibitors are distressed by the inflationary pressure on ticket prices. It all began when the Government cut down on movie prices drastically. It had made film watching a luxury. For the industry, which is dependent on the middle class, movie tickets getting so expensive is not viable for them.

# Ease My Trip, Flybig in ticket sales pact

SHRINIVAS  
New Delhi, January 12

The flight ticket sales pact between Ease My Trip and Flybig is set to be implemented in the first week of January. The partnership is expected to boost the regional airline's first-time partnership with an online travel platform for flight bookings. This also marks India's first airline-travel company to enter into a similar agreement for a domestic market.

Nishant Mittal, CEO and founder of Ease My Trip, said the partnership will help Flybig's regional network along with EMT's digital marketing and customer engagement services. All the details of the pact will be shared in a separate press release.
